

International Orthopedic Students School

The LKH Murtal-Stolzalpe in Austria is well known as an international education center for postgraduate trainings and more than 3.000 surgeons from over 15 countries have already visited Stolzalpe during the last two decades for our training programs.

As a teaching hospital for the Univ of Graz and Vienna the LKH Murtal-Stolzalpe has also developed twice a year a unique one-week orthopedic training program for International and Austrian students which is credited by the Univ of Graz with 2 education hours.

During this intensive training week, the students will get an overview on basics of orthopedics with lectures, case discussion, practical workshops, and visits to the OR (see attached program). The subspecialized 9 teams from Stolzalpe Orthopedic Department will give an insight in modern orthopedic management and offer a lot of space for questions and discussions. The feedback of the students was always excellent and some of them even came back to work with us.

The international students are coming from all European countries in cooperation with AMSA. This training week will also include some social activities, which allow to make new friendships.

The training weeks for 2024 will be

Winterschool Feb 12 to 16

Summerschool Sept 9-13.

Accommodation and meals will be offered by the hospital for EUR 15/day. If you are interested, you might visit our homepage www.lkh-murtal.at or contact directly our secretary Mrs. Setznagel at orthopaedie.sto@kages.at.

We are looking forward to welcoming you at Stolzalpe hospital, a unique place in the mountains of the green Styria region in Austria.
